

# Afham Dunnur

## MEAN Developer

As an aspiring Angular developer with a passion for creating user-friendly and efficient web applications, I am excited to contribute my skills and dedication to a dynamic team. During my 7-month trainee experience, I had the opportunity to immerse myself in the world of Angular development, where I honed my abilities in building responsive and interactive interfaces. My strong foundation in TypeScript, HTML, and CSS, coupled with a commitment to staying up-to-date with the latest industry trends, enables me to tackle challenges and deliver high-quality solutions. With a keen eye for detail and a collaborative mindset, I am eager to be part of innovative projects that make a meaningful impact.

## Experience

2023

prototype

trainee

worked as trainee for the period of 6 months .completed two projects using javascript,node and express and second project with MEAN .

## PROJECT

### ecommerce

completed a ecommerce project using node,express and javascript. it was based on watches where we can sell watches through online similar to that of selling groceries.

### course managamnet

it is like making an administrator who is able to manage students and teacher. there is a student and teacher dashboard that is able to add assignments and also made chatting option between teacher and student.
